## Career Objectives

---

I'm a full-stack web developer with hands-on skills & knowledge willing to take on challenging and productive roles. I'm a quick thinker and a good debugger looking for a position to utilize my skill & knowledge as well as to learn and continuous improvement.

## Skills

---

Expertise	: HTML, CSS, JavaScript, React.js, MongoDB, REST API, Tailwind CSS, Bootstrap, JWT.
Comfortable	: Node.js, Express.js, Recharts.
Familiar	: TypeScript, Material UI, Stripe, Leafletjs.
Tools	: VS Code, Chrome Dev Tools, React Developer Tools, GitHub, Figma, Netlify, Heroku, Adobe XD.

## Interpersonal Skills

---

- Excellent communication, organizing, and demonstration skills.
- Combine patience, determination, and persistence to troubleshoot issues or debug.
- Excellent multitasker to handle multiple tasks simultaneously.
- Flexible, efficient, and can prioritize work on a variety of paces and schedules.

## Projects

---

- **Manufacturer website with dashboard, booking & payment**

Links: [Live Site](#) | [GitHub](#) (Client) | [GitHub](#) (Server)

**Features:**

- Different functionalities based on user authorization level such as user & admin.
- Product booking, payment & shipment feature with dynamic product information.
- 3-layers of authentication and authorization securities (JWT authentication, server-side verification, and database verification)

**Technology used** : React.js, Node.js, Express.js, MongoDB, Firebase, REST API, JWT, React Query, Axios, Tailwind CSS, DaisyUI

**Build time** : 05 days

- **Inventory Management with data visualization**

Links: [Live Site](#) | [GitHub](#) (Client) | [GitHub](#) (Server)

**Features:**

- Data visualization for inventory items status like stock level, sale vs stock graph
- Users can see all product information in tabular format with the pagination feature.
- User can add items, update items, delete items and restock items.

**Technology used** : React.js, Node.js, Express.js, MongoDB, Recharts, Firebase, REST API, JWT, Tailwind CSS

**Build time** : 06 days

- **Task Organizer (To Do)**

Links: [Live link](#) | [GitHub](#) (Client) | [GitHub](#) (Server)

**Features:**

- Logged in user can create and delete any tasks
- After completion, the tasks will be grayed out with strike through text.
- Fully responsive on mobile, tablet & desktop devices.

**Technology used** : React.js, Express.js, MongoDB, Firebase, REST API, JWT, Tailwind CSS

**Build time** : 01 day

## Professional Training

---

### Complete Web Development Course (Full-Stack)

By [Programming Hero](#), 2021.

Duration: 06 months.

## Educational Background

---

### B.Sc. in Mechanical Engineering

From the University of Creative Technology, Chittagong.

2020-2025(expected)

## Language Proficiency

---

- Bengali : Native
- English : Fluent
